RIMINI ITALY

Ecomondo 2015: a record-breaking edition

At Rimini Fiera the best edition of the expo on the green economy

Italy has to focus on Green Economy to boost its upswing. This is the message from the expo days at Rimini Fiera, where the innovative proposals of the 1,200 companies and the contents of 200 seminars with over 1,000 speakers showed the importance of an industrial and scientific system up to the most advanced standards, as well as providing a model for other nations' economies. The presence at the expos of industry and trade members from all over the world ensured the days a really international dimension.

103,514 (1.68% more than 2014) professional visitors attended over the four days, a figure that stabilizes the European ranking of Ecomondo and the expos held simultaneously with it. This figure also contains the planned rise of the foreign component, with almost 11,000 industry/trade members and 500 buyers from all over the world. Also worthy of mention were the numerous representatives from Iran and China, whose visits were organized along with the Ministry for Environment.

PTC - Master Fluid presents its new Built-In compact jetting modules.

The PTC - Master Fluid booth has captured the interest of visitors and professionals during all four days of the show, in particular thanks to the new series of Built-In units for canal jet but also with its other units and accessories for urban cleaning. The company is investing heavily in the development of technological applications for its products, always with the aim to deliver value to its customers in the name of manufacturing excellence and continuous innovation.
